“A Systems Approach to Dissecting Immunity”

演者: Alan Aderem, Ph.D.

Executive Vice President and Director
Institute for Systems Biology
Seattle, Washington, U.S.A.

Dr. Alan Aderem, ISB cofounder and Director, is an internationally recognized immunologist and cell biologist who plays a central role in defining the scientific direction of the Institute and is responsible for overseeing the integration of the wide variety of disciplines within the organization. Aderem leads a scientific team investigating the roles of the immune system in health and disease.
